

## Who is 3.14 Academy?

*We are a non-profit organization that provides police interaction training when working with people on the autism spectrum.*

## How do we do what we do?

*Our training starts with a review of your current policies towards detaining or investigating individuals with mental health issues and/or development impairments.*

*We then build a customize training that supports current policies and highlights any gaps that pertain to the autistic community.*

*This training can be delivered both online and on-site.*

*An After-Action report of gaps and findings will be provided so the department can integrate change into their strategic plan.*

## Why “3.14 Academy”?

*The aspects of pi align with the values of our mission:*

- *Pi involves the circumference of a circle. That circumference represents the entire community. It takes awareness and understanding from the entire community to maximize the impact of this training.*
- *Pi equals that circumference divided by the diameter. The diameter represents the connection of two groups of people; the autistic community and law enforcement. Our training will bridge that connection and build awareness.*
- *Pi is a value that never repeats. Our training is customized for your department and community.*
- *Pi is infinite...just like our possibilities!*

**Contact Us Today,** *and let's start on the path to understanding and awareness*

Parents of children with autism are not looking for perfection, they are looking for progress

And we thank you for considering this training.
